To whom it may concern,

Angela was seen on 7/9/18 for acute exposure to the spray from a crop-duster. She came in with acute respiratory, GI and skin symptoms. The deputy had informed us of the Round up, Tap Out and Ultra Blaze that was used by the crop-duster. Her acute symptoms are clinically correlated to the acute exposure she had to these chemicals.

Roy Mortinsen, MD.  
Sanford Vermillion Emergency Department.
